LIMIT UNCERTAINTY

Integra LifeSciences, a world leader in medical devices, is dedicated to limiting uncertainty for surgeons, so they can concentrate on providing the best patient care. Integra offers innovative solutions in orthopedics, neurosurgery, spine, reconstructive and general surgery.

Integra's orthopedic products include devices and implants for spine, foot and ankle, hand and wrist, tendon and peripheral nerve protection and repair, and wound repair. Integra is a leader in neurosurgery, offering a broad portfolio of implants, devices, instruments and systems used in neurosurgery, neuromonitoring, neurotrauma, and related critical care.

Limit uncertainty by enhancing knowledge sharing.

Training: a corporate culture

Our job does not stop at the sale of a product, our role involves assisting users in their choice of the most suitable product and also seeking to improve therapeutic solutions. Each year we organise courses for each of our product lines that combine theory and practice. These courses organised in partnership with surgical consultants from leading medical centres, are an opportunity for professionals to acquire or perfect their knowledge and interact with their peers.

Furthermore we are involved in the scientific community through the organisation of themed gatherings. These Symposiums allow surgeons from all around the world to present their work and thoughts.

Integra offers surgeons' trainings in three specific surgical fields:

- › **Neurosurgery**
- › **Extremity Reconstruction**
- › **Spine & Biologics**

Schedule of the 2011 ■ Training courses

Every training course will have a specific pre-announcement and scientific program.
